PROJECTS

Portfolio
I Developed a personal portfolio website using HTML, CSS, and JavaScript, featuring an engaging introduction, about me section, skills showcase, project displays, and a contact form. This project demonstrates my skills in responsive, user-friendly web design and front-end development.

Website Design
A responsive static website utilizing HTML, CSS, and JavaScript. Implemented a mobile-first design approach to ensure optimal viewing across various devices and screen sizes. Focused on user experience and accessibility while adhering to best practices in web development.

Weather Application Design
The dynamic smartphone interface provides real-time data like weather, date, and battery percentage, featuring three interactive iframes for weather updates, Google search, image, and YouTube loading interface. Users can easily switch between iframes, enhancing accessibility and user experience.

Code Editor
The user-friendly code editor enables real-time execution of HTML and CSS, featuring dark and light modes and adjustable font sizes for improved readability. This project highlights my front-end development and UI design skills.
